SUSPENSE

Date

Remarks:

- Per our talk -
1. KIQ's to tend slightly toward the general
 2. KIQ's to be supplemented by "USIB Agenda Questions" for collection + production guidance and for specific evaluation
 3. KIQ ~~evaluations~~ evaluations to be "arbitrary, subjective + simple" by NIO initially processed thru USIB
 4. Table 12 is an example of how DCI could reject CIG/DDO's not assuming an obligation under 2C + 2X.

MEMORANDUM FOR THE DCI

Bill,

Attached is a Report on the KIQ/KEP Pilot Program Baseline experiment my staff prepared. There is also a briefing under preparation by Lou Lapham's staff. Danny has reviewed this report and asked me to send it on in to you--he suggests it would be beneficial if you could read it before we meet on where we go next with the KEP.

I have in train a further analysis of collection capabilities against each KIQ as expressed by the Program Managers in their indications of 0, 10 or hi probabilities against each deficiency. This will be done by the end of the week. One example of the kind of interesting things such an analysis may show is reflected in the responses to the Southeast Asia KIQ

25X1

25X1

There may be good reasons for these apparent anomalies but we won't know unless we ask and, as you know, being able to ask the right questions is half the battle.
